Wooden Wall Map Display Unit

This high quality wooden wall map holder can hold up to 10 maps, and is available in three widths - 60", 66" or 79". Stained an English Chestnut or available unstained. Attractive enough for the boardroom, functional enough for schools or bustling county departments. Call for pricing.

Spring Roller Mounted Wall Map Operation

Changing between multiple maps on one roller:

1. To change between one map and another, gently pull on the loop cord attached to the bottom rail to position maps 10-12 inches from the top roller. **See figure 1 below.**

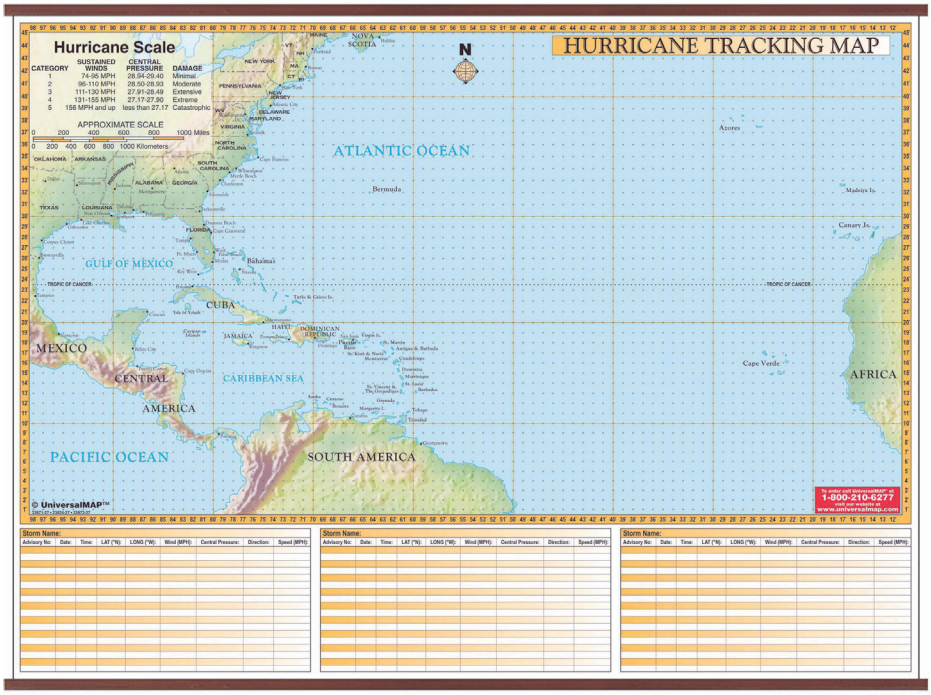

2. Flip maps (A, B, etc.) that are in front of the map you want to view over the top of the roller and let them drop behind.
3. Pull down on the wooden rail until the spring roller locks to reveal your selected map.

Steps to re-spring a map roller:

Roller mounted wall maps occasionally lose their spring tension. Here's what to do if this happens to your wall map:

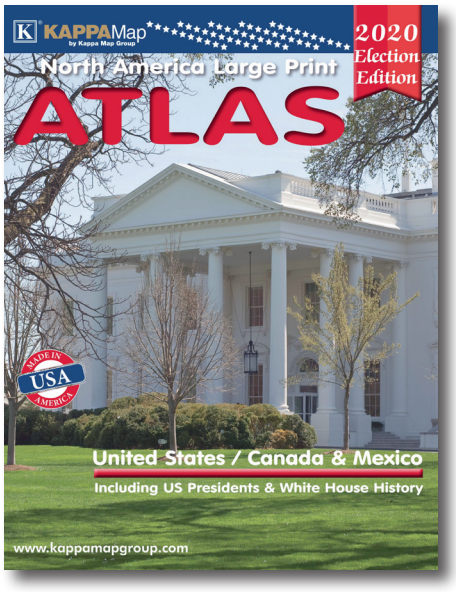

1. Remove the wall map from mounting brackets.
2. Inspect each end of the roller. On one end, you will observe a round stationary post and on the other end, you will notice a flat post that can be turned.
3. The flat post end has a gear type mechanism shaped like a star. Along the outer rim, you should observe teeth. By turning or rotating the wooden roller, these teeth should drop into place and lock on the points of the inner star.
4. To re-spring the tension, hold the roller parallel with the floor. Grasp the flat post end of the roller with a pair of pliers and turn it clockwise, one click at a time. Continue turning five to six turns. Re-hang map on mounting brackets and check for proper tension. Repeat several more turns if additional tension is needed for proper spring action.
